AnyComms Plus

File Transferring. Simplified

A web based file transfer system which helps to eliminate the loss of physical media.

Designed specifically with local authorities in mind, Avco's web based file transfer application, AnyComms Plus, provides secure, audited data transfers both internally and with affiliated organisations. AnyComms Plus allows users to move data to and from various locations in the knowledge that the files will be transferred securely.

Simple administration.

With no browser plug-ins to install or configure, administering AnyComms Plus is simple. The use of standard web technologies ensures that AnyComms Plus will work equally well with Mac or Windows platforms. The system incorporates automatic email notification to advise users that their files have been delivered or collected. The Administrator can select and configure the files to be uploaded and downloaded and has access to a range of logging options to confirm that data transfers have been successful.

Simple configuration.

The software is configured via simple, intuitive web forms, so very little training is required. Administrators and other users are controlled through the system's own database. Each user has a login ID and a password. The system allows for "three strikes and out" configuration so that user accounts can be locked after three failed login attempts. Should a user's login details be lost or forgotten, the Administrator can retrieve the details from the database on the user's behalf.

Benefits and Features

AnyComms Plus protects your sensitive data

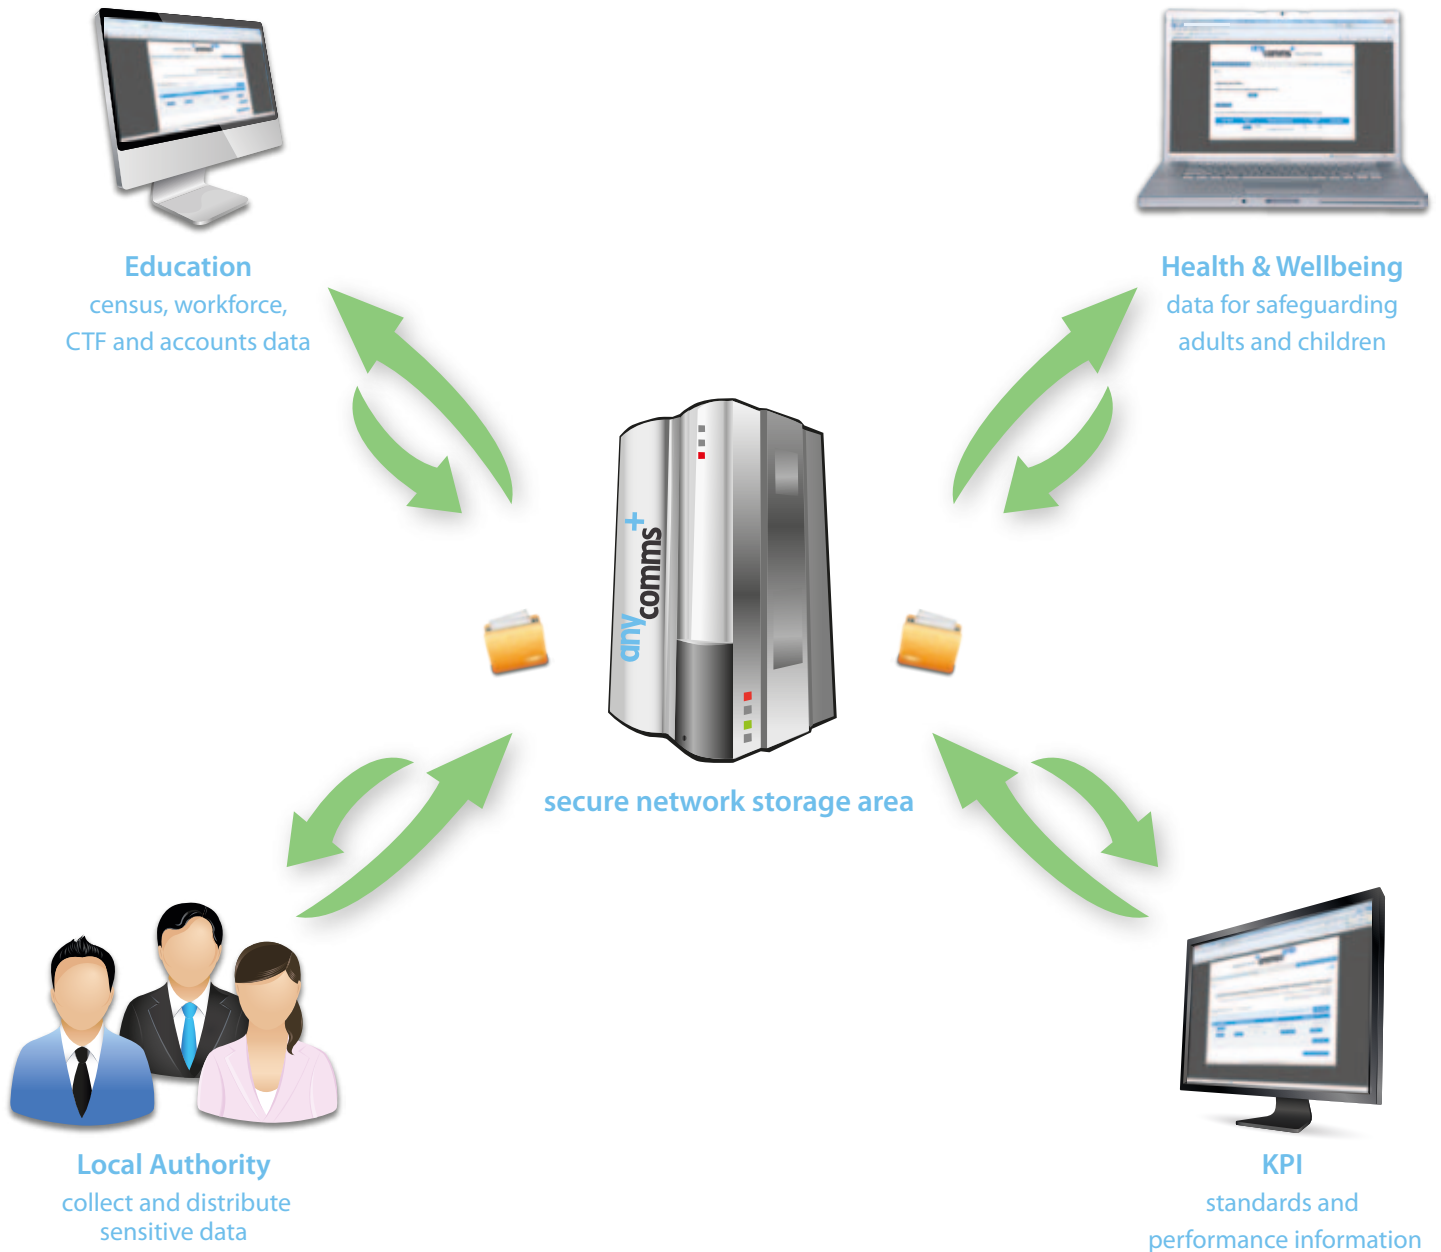

Advantages and benefits

- + Simple and secure solution with maximum impact
- + Intuitive interface
- + Minimal administration
- + Personal support
- + Helps to eliminate the loss of physical media
- + Cost effective solution with minimal investment

Testimonials

AnyComms Plus has greatly eased the process of transferring confidential files to and from schools and the local authority. It is simple to use and excellent value for money. We found that users needed no direct training on how to use it. The support that we get from Avco Systems is first class and I would happily recommend this product to any local authority.

Mariam Forrester, ONE Team Manager, Leicester City Council

Several of our partner organisations have commented on how impressed they are by the obvious security of our data transfer system AnyComms Plus, and its ease of use.

Martin Edgar, Systems Support Officer, Hartlepool Borough Council
