

## PRESS RELEASE

---

For Immediate Release: 29/10/2010

### SIGNS ARE GOOD FOR COMPANY'S NEW HQ

Bucking the economic downturn means prestigious new headquarters for Avco Systems in Slough.

Avco Systems Ltd has responded to continuing growth in the recession by recently establishing a new headquarters building at a prime position on the Bath Road, next to the Town Hall, moving from its old premises on the Brunel University Science Park in Egham.

Over the next week, new signage will be erected at the front of the building close to the junction of Bath Road and Ledger's Road and the company hopes it will not distract motorists whilst the work is being carried out.

After an extensive search Slough was found to have the highest quality premises, communication links and local facilities within a 20 mile radius and is ideal to further help our expansion.

Avco employs some of the most highly skilled technical staff in the region and it was felt that giving them a prestigious working environment was only fitting for this new era in our 24 year history.

"As our growth and expansion continues we also need access to a highly skilled talent pool. Slough is therefore an ideal place to be" says Mark Rance, Avco's General Manager.

Avco is already scouting for talented individuals to join its programming teams and will be inviting anyone with ambition to contact them. A unique online aptitude test is being devised and it would be worthwhile keeping a close eye on the web site for new positions.

#### About Avco Systems

Established in 1986 at the Science Park of Brunel University's Runnymede Campus, Avco Systems has grown at a solid, steady pace. With its team of highly skilled developers, it has been providing customised software development services to many hundreds of clients. Avco is ISO9001 and TickIT certified and strives to provide quality development solutions.
