AVCOSYSTEMS

Location: Slough UK
Salary: £30k – £45k (based on experience)
Job Type: Permanent
Job Description: Infrastructure and Network Engineer

Avco Systems Ltd. is a modern, growing Software Development business based in Slough, UK.

We work with some of the largest businesses in the UK and help them develop, support, maintain and host their large software projects. We have a sharp focus on client satisfaction, rapid feedback and ongoing improvement, so we are looking to grow our team with some forward thinking, enthusiastic people that will help continue to drive the business forward.

We are seeking an experienced individual to fill a pivotal role within our team. If you're passionate about technology and enjoy the challenges of working in a dynamic role then you could be just who we're looking for.

What's it like to work with us?

You'll work closely with a great team of fun, but focused, like-minded Software Engineers and IT Ops colleagues. Grow your skills and experiment with new tools, techniques and technologies on a wide variety of projects. You'll be a key member of our team, making vital technical decisions and working to bring a positive change to the business.

Why should you join?

We are always looking for the right person to join our fast-growing team of knowledgeable, friendly and forward-thinking individuals, and there are plenty of reasons why you should consider joining us:

- **Excellent job security** - we've been growing for 30 years and have maintained a consistent financial growth year-on-year.
- **Room to grow** - all voices are heard, and anyone can expand beyond their job role.
- **Stay in shape for free** - with our onsite gym, or tennis/basketball courts right outside.
- **Good location** - ample parking and walking distance to the well-connected Slough train station.
- **Games room** - unwind with a game of pool, table tennis, board games, Xbox and more.
- **Latest technology** - take the opportunity to stay at the forefront of the IT industry and experiment with new technologies.

What skills are we looking for?

You might be ideal for this role if you understand much of the following, have the experience to prove it, and you're up to the challenge of learning the rest:

- Networking (Firewall, IP, DNS, VLAN, VPN etc.).
- Active Directory administration.
- Operating System installation, configuration & deployment (Windows & Linux).
- Network / system monitoring.
- Virtualisation management/monitoring.
- Data backup and associated procedures.
- Basic scripting / software skills.
- Basic database administration (various vendors).
- Diagnostic skills.
- PCI DSS compliance.
- Managing cloud-based infrastructure (e.g. AWS, Azure).
- Container orchestration (e.g. Kubernetes).

What will you be doing?

- Support, maintain and improve the IT infrastructure of the building, including the internal network, data centre and PCI networks. This includes all critical services such as email, DNS, VOIP, switches, Internet fibre, as well as our infrastructure at AWS, Azure and other cloud service providers.
- Design, plan, implement and manage the deployment of new infrastructure components.
- Locate, diagnose and resolve technical issues.
- Take care of occasional technical customer enquiries and handle issues through to a conclusion.
- Assist in the deployment, maintenance and support of applications at cloud service providers, our data centre and remotely in our clients' data centres.
- Support the team to maintain/improve compliance to ISO 27001 & PCI DSS.
- Deal/negotiate with IT suppliers - hardware, fibre etc.
- Work alongside other areas of the business to support client requirements.
- Guide and mentor less experienced members of the team.
- Help build the team to further support the business.

If you think we're a good fit for you then don't hesitate to get in touch.

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, colour, national origin, gender, sexual orientation, age, marital status, veteran status, or disability.

Strictly No Agencies.
