

AVCOSYSTEMS

Location: Slough UK

Salary: Circa £16 - £18k

Job Type: Placement

Job Description: Software Engineer

Avco Systems Ltd. are a modern, growing Software Development business based in Slough, UK.

We work with some of the largest businesses in the UK, Europe and America to help them develop, support, maintain and host their large software projects. We have a sharp focus on client satisfaction, rapid feedback and ongoing improvement, so we are looking to grow our team with some forward thinking, enthusiastic people that will help continue to drive the business forward.

Want to work as part of a software development team, but have no experience? We can teach you everything you might not know about software development, whilst you get involved in some of our exciting projects. If you're passionate about technology and enjoy the challenges of working in a dynamic role then you could be just who we're looking for.

What's it like to work with us?

You'll work closely with a great team of fun, but focused, like-minded Software Developers and IT Ops colleagues. Get to grow your skills and experiment with new tools, techniques and technologies on a wide variety of projects.

What skills are we looking for?

You might be ideal for this role if you understand much of the following, and are up to the challenge of learning the rest:

- Java, or C#. Experience of ASP.NET MVC or similar would be beneficial - Note: If you are applying for a placement position, knowledge of any programming language is acceptable.
- Understanding of HTML, CSS and JavaScript.
- SQL and basic database administration skills (MS-SQL, MySQL, etc).
- Unit testing - its role and importance in software development.
- Source Control (Git is preferred, but experience of any other system would be acceptable)

Your role & responsibilities

- Work as part of a team to plan, execute, deploy and support software development projects.
- Write high quality, unit tested software that meets the Company's coding standards.
- Perform code reviews and encourage a culture of high quality engineering.
- Locate and fix defects in software.
- Meet and work with clients to ensure that overall business needs are being met.
- Understand Business Requirements and contribute to design discussions.
- Assist to produce specifications and designs where required.

a: Avco systems Ltd. | 17 Bath Road | Slough | Berkshire | SL1 3UF | Reg. No. 1976620

- Deal with occasional, technical customer enquiries and manage any issues through to a conclusion.
- Assist to deploy, maintain and support applications both in our datacentre and remotely in our clients' data centres.
- Work closely with other areas of the business to support client requirements.
- Guide and mentor less experienced members of the team.
- Help build the team to further support the business.
- Provide clear updates on progress to the team as well as clients.

If you think we're a good fit for you then don't hesitate to get in touch with us.

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, colour, national origin, gender, sexual orientation, age, marital status, veteran status, or disability.

Strictly No Agencies.
