

AVCOSYSTEMS

Location: Slough UK

Salary: Circa £16 - £18k

Job Type: Placement

Job Description: Software Developer

Avco Systems Ltd are a modern, growing Software Development business based in Slough, UK.

We work with some of the largest businesses in the UK, Europe and America to help them develop, support, maintain and host their large software projects. We have a sharp focus on client satisfaction, rapid feedback and ongoing improvement, so we are looking to grow our team with some forward thinking, enthusiastic people that will help continue to drive the business forward.

Work closely with a great team of fun, but focused like-minded Software Developers and IT Ops colleagues. Grow your skills and experiment with new tools, techniques and technologies. Work on a wide variety of projects and influence positive change to the business.

We are seeking multiple positions in our team with varying levels of experience. (Training provided where necessary.)

Placement Software Developer (Various Languages)

Roles/Responsibilities:

- Work as part of a team to plan, execute, deploy and support software development projects.
- Write high quality, unit tested software that meets the Company's coding standards.
- Perform code reviews and encourage a culture of high quality engineering.
- Locate and fix defects in software.
- Meet and work with clients to ensure that overall business needs are being met.
- Understand Business Requirements and contribute to design discussions.
- Assist to produce specifications and designs where required.
- Deal with occasional, technical customer enquiries and manage any issues through to a conclusion.
- Assist to deploy, maintain and support applications both in our datacentre and remotely in our clients' data centres.
- Work closely with other areas of the business to support client requirements.
- Guide and mentor less experienced members of the team.
- Help build the team to further support the business.
- Provide clear updates on progress to the team as well as clients.
